These include the installation of LED lighting in academic buildings, laboratories, hostels, and street lighting systems to replace conventional energy-intensive fixtures. Energy-efficient appliances and star-rated equipment are being procured wherever feasible. The institute has also promoted the use of renewable energy through the installation of solar panels for selected applications, along with solar water heating systems in hostels and residential areas. Regular maintenance of electrical infrastructure, awareness programs for staff and students on energy conservation practices, and optimization of laboratory equipment usage schedules are also implemented to minimize unnecessary energy consumption. These measures collectively contribute to improved energy efficiency and reduced carbon footprint of the institute.
